#### **DETAILED ACTION**

### Response to Arguments

- (1) Applicant's amendments of claims 2, 5, 9, 13, 18 and 21 with respect to the rejection under 35 U.S.C § 112, second paragraph, have been fully considered. The rejection of claims 2, 5, 9, 13, 18 and 21 has been withdrawn.
- (2) Applicant's arguments with respect to the rejection of claims 25-30 under 35 U.S.C § 112, second paragraph, have been fully considered and are persuasive. The rejection of claims 25-30 has been withdrawn.
- (3) Applicant's arguments with respect to the rejection of claims 1, 9 and 17 under 35 U.S.C § 103 have been fully considered but they are not persuasive.

### As argued by applicant at page 11:

However, it is respectfully submitted that the e-book (Corley, et al.: The Legal and Regulatory Environment of Business, 11'h Edition, hereinafter "Corley") to which the Examiner refers in the McGraw reference is an e-bock that already exists in the McGraw system at the time a user clicks the "Add" button on the screen shown at the top of page 5 of the Office Action. It is respectfully submitted that McGraw neither teaches nor suggests that the "Add" features adds an identifier of user-provided content, as required by claim 1.

Rather, the selection of a chapter or section by clicking the "Add" button in McGraw appears only to add to an e-book content already existing in the McGraw system. There is no teaching or suggestion that it would result in the addition of the chapter or selection to Corley, since the respective chapter or section currently exists in the e-book Corley.

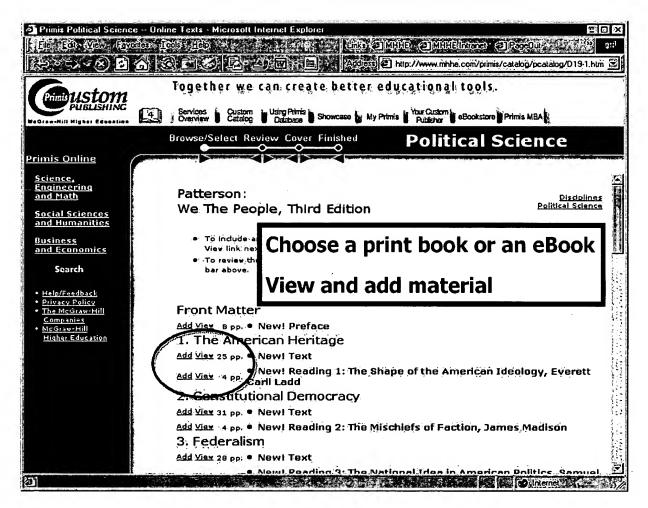

Art Unit: 2162

Examiner respectfully traverses because of the following reasons:

As recited in claims 1, 9 and 17:

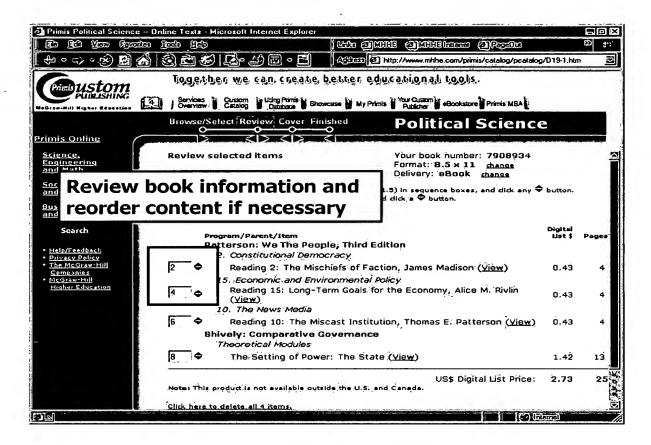

adding the identifier of the user-provided content to the list.

As seen at screenshot II and III below:

Screenshot II

Art Unit: 2162

#### Screenshot III

By selecting the add button at screenshot II, four pages of Reading 2: the Mischiefs of Faction, James Madison as user-provided content, Which is identified by its identifier: Reading 2: the Mischiefs of Faction, James Madison, and this identifier of these four pages as user-provided content is added to the list as shown at screenshot III.

Similar to screenshot II, the page of Corley, et al.: The Legal and

Regulatory Environment of Business, 11<sup>th</sup> Edition includes a plurality of

chapters such as Chapter 1, Chapter 2... The content of a chapter are

sections such as New! Business Decision: Calling All Smoker, New!

Page 5

What is Law... The content of each section is the texts content. A section under a chapter, or the text of a section is an example of the content that will be provided by user in order to compile a user own book by using the Add button. When a user activate the Add button to add the content of a section into his/her own book, the content of a section will be assigned an identifier that is the section name, and the content of the chapter will be assigned an identifier that is the chapter name. Referring back to the page of Corley, et al.: The Legal and Regulatory Environment of Business, 11th Edition, one page of text Of New! Business Decision: Calling All Smokers as user-provided content is received by the server when activating the Add button, section name New! Business Decision: Calling All Smokers as an identifier is assigned to one page of text. The screenshot II above also illustrates the content that is provided by a user to compile his/her own book by using the Add button. The screenshot III illustrates a table of content or list of a user own book. The list is added with the identifier of the user-provided content by using the Add button of the screenshot II. The user can view four pages of Reading 2: the Mischiefs of Faction, James Madison as user-provided content by activating the View button, and Reading 2: the Mischiefs of Faction, James Madison as an identifier is assigned to four pages of text.

As argued by applicant at page 11 with respect to claims 4, 12 and 20:

Art Unit: 2162

Accordingly, it is respectfully submitted that claims 1, 9 and 17 and their dependent claims are not rendered unpatentable by McGraw. Since claims 4, 12 and 20 recite similar elements, claims 4, 12 and 20 and their dependent claims should be deemed patentable for the same reasons.

Examiner respectfully traverses because claims 4, 12 and 20 recite similar elements with claims 1, 9 and 17. Therefore, claims 4, 12 and 20 are unpatentable for the reasons as discussed above.

As argued by applicant at page 11 with respect to claims 2, 3, 5, 8, 10, 11,
13, 16, 18, 19, 21 and 24:

Claims 2-3, 5, 8, 10-11, 13, 16, 18-19, 21 and 24 should be deemed patentable by virtue of their dependency to independent claims 1, 4, 9, 12, 17 and 20 for the reasons set forth above.

Examiner respectfully traverses because dependent claims 2, 3, 5, 8, 10, 11, 13, 16, 18, 19, 21 and 24, each depends either directly or indirectly from independent claims 1, 4, 9, 12, 17 and 20. Therefore claims 2, 3, 5, 8, 10, 11, 13, 16, 18, 19, 21 and 24 are unpatentable for the reasons as discussed above.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 2162

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 4, 6-7, 9, 12, 14-15, 17, 20, 22-23 and 25-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over The McGraw-Hill Companies (McGraw-Hill) [Build a Book Online,

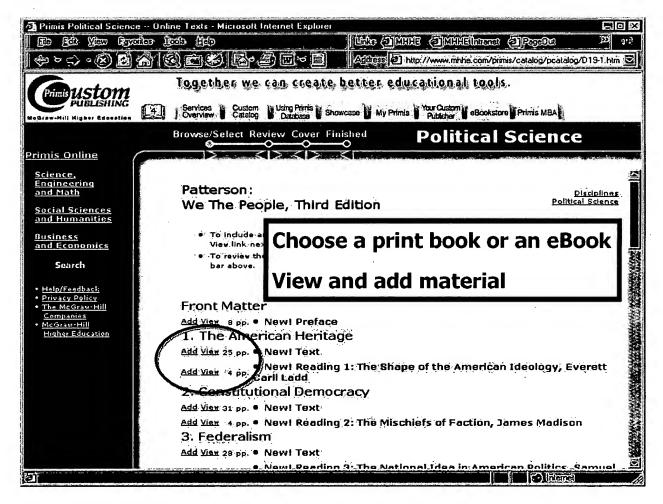

http://web.archive.org/web/19980513002459/http://mhhe.com/primis/ and http://www.mhhe.com/primis/catalog/pcatalog/primisweb.ppt].

Regarding to claims 1, 9 and 17, McGraw-Hill teaches a method and system for building an e-book as a content object stored as a plurality of content entities. As shown at screenshot III, the e-book as content object is defined by a list of chapters and sections as content entity identifiers.

Art Unit: 2162

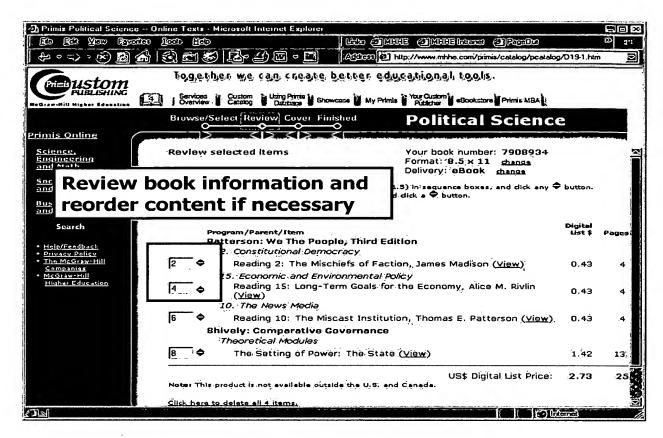

Screenshot I

Screenshot II

Art Unit: 2162

Screenshot III

The screenshot II includes a plurality of chapters such as The American

Heritage, Constitutional Democracy... The content of a chapter are sections such

as New! Reading 2: The Mischiefs of Faction, James Madison... The content

of each section is the texts content indicated by the number of pages of text. A section

under a chapter, or the text of a section is an example of the content that will be

provided by user in order to compile a user own book by using the Add button

(Screenshot III, and What is Primis Database Publishing in Build a Book Online,

<a href="http://web.archive.org/web/19980513002459/http://mhhe.com/primis/">http://web.archive.org/web/19980513002459/http://mhhe.com/primis/</a>). When a user

activate the Add button to add the content of a section into his/her own book, the

Art Unit: 2162

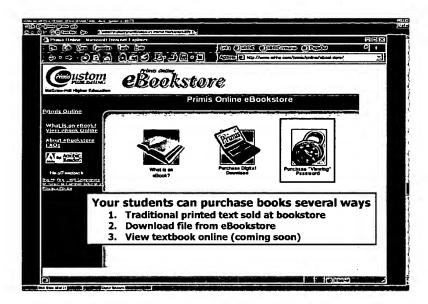

content of the chapter will be assigned an identifier that is the chapter name. Referring back to the screenshot II, four pages of text of New! Reading 2: The Mischiefs of Faction, James Madison as user-provided content is received by the server when activating the Add button, section name New! Reading 2: The Mischiefs of Faction, James Madison as an identifier is assigned to four pages of the text.

Page 10

The screenshot III illustrates a table of content or list of a user own book. The *list* is added with New! Reading 2: The Mischiefs of Faction, James Madison as the identifier of the four pages of text as user-provided content using the Add button of the screenshot III. The user can view four pages of Reading 2: the Mischiefs of Faction, James Madison as user-provided content by activating the View button.

McGraw-Hill does not explicitly teach the step of *storing* the user-provided content and its identifier *in the data repository*. However, as in the Presentation Presenting How To Use Primis Online (Screenshot IV), a user could download the e-book as one way to purchase the book. In order to download the e-book, obviously, the e-book that contains *the user-provided content and its identifier* has to be stored in *a data repository* at the server site.

Art Unit: 2162

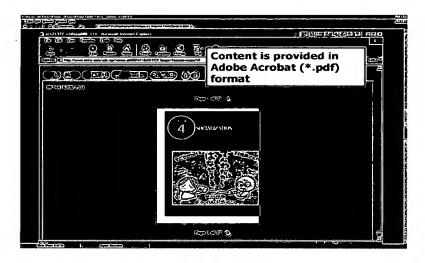

Screenshot IV

Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the McGraw-Hill method by storing the e-book in a data repository in order to build and download a customized e-book.

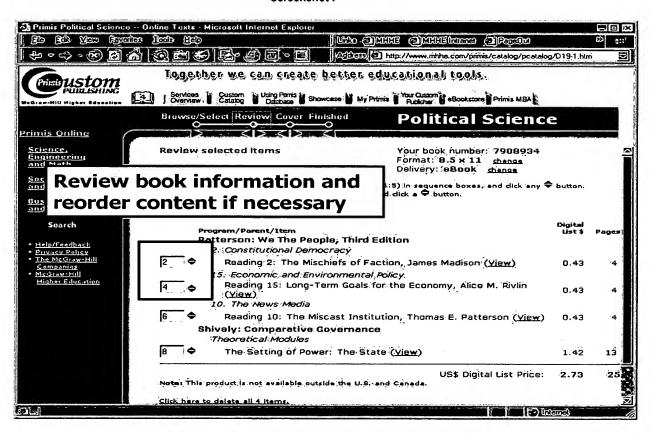

Regarding to claims 4, 12 and 20, McGraw-Hill teaches a method and system for building an e-book as a content object stored as a plurality of content entities. As shown at the screenshot III, the e-book as content object is defined by a list of chapters and sections as a hierarchical outline of containers and content entity identifiers.

Art Unit: 2162

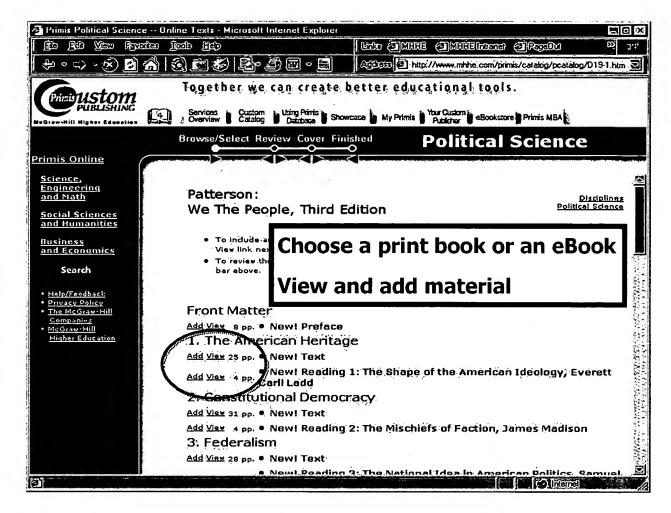

Page 12

Screenshot I

Screenshot II

Art Unit: 2162

Screenshot III

The screenshot II includes a plurality of chapters such as The American Heritage,

Constitutional Democracy... The content of a chapter are sections such as New!

Reading 2: The Mischiefs of Faction, James Madison... The content of each section is the texts content indicated by the number of pages of text. A section under a chapter, or the text of a section is an example of the content that will be provided by user in order to compile a user own book by using the Add button (Screenshot III, and What is Primis Database Publishing in Build a Book Online,

http://web.archive.org/web/19980513002459/http://mhhe.com/primis/). When a user

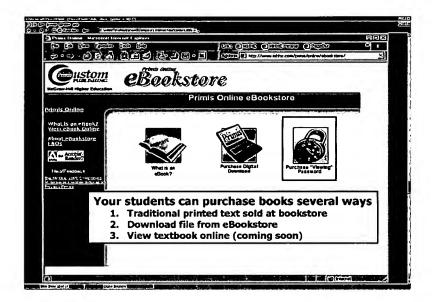

Art Unit: 2162

activate the Add button to add the content of a section into his/her own book, the content of a section will be assigned an identifier that is the section name, and the content of the chapter will be assigned an identifier that is the chapter name. Referring back to the screenshot II, four pages of text of New! Reading 2: The Mischiefs of Faction, James Madison as user-provided content is received by the server when activating the Add button, section name New! Reading 2: The Mischiefs of Faction, James Madison as an identifier is assigned to four pages of the text.

The screenshot III illustrates a table of content or hierarchical outline of a user own book. The outline is added with New! Reading 2: The Mischiefs of Faction, James Madison as the identifier of four pages of text as the user-provided content using the Add button of the screenshot II. The user can view four pages of Reading 2: the Mischiefs of Faction, James Madison as user-provided content by activating the View button.

McGraw-Hill does not explicitly teach the step of *storing* the user-provided content and its identifier *in the data repository*. However, as in the Presentation Presenting How To Use Primis Online (Screenshot IV), a user could download the e-book as one way to purchase the book. In order to download the e-book, obviously, the e-book that contains *the user-provided content and its identifier* has to be stored in *a data repository* at the server site.

Art Unit: 2162

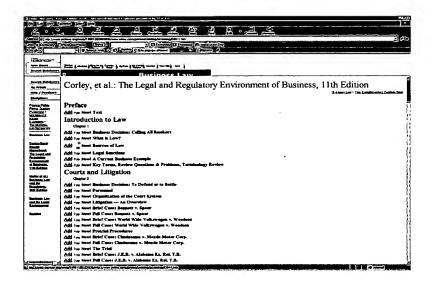

Screenshot IV

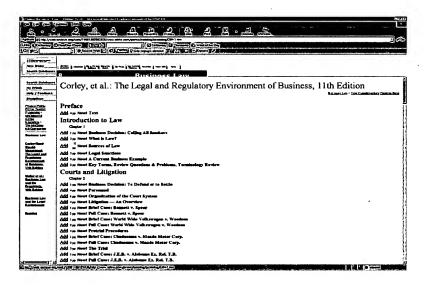

Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the McGraw-Hill method by storing the e-book in a data repository in order to build and download a customized e-book.

Regarding to claims 6, 14 and 22, McGraw-Hill teaches all the claimed subject matters as discussed in claims 4, 12 and 20, McGraw-Hill further discloses *the user-provided content comprises a content entity* (McGraw-Hill Primis Custom Publishing).

Art Unit: 2162

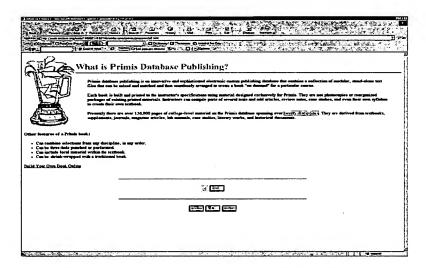

Regarding to claims 7, 15 and 23, McGraw-Hill teaches all the claimed subject matters as discussed in claims 4, 12 and 20, McGraw-Hill further discloses *the user-provided content comprises a container* (McGraw-Hill Primis Custom Publishing).

Regarding to claims 25-30, McGraw-Hill teaches all the claimed subject matters as discussed in claims 1, 24, 9, 12, 17 and 20 McGraw-Hill further discloses *the received* 

Art Unit: 2162

user-provided content is not of the content object and wherein the plurality of content entities define the content object as a compilation of related content (McGraw-Hill Primis Custom Publishing).

Claims 2-3, 5, 8, 10-11, 13, 16, 18-19, 21 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over The McGraw-Hill Companies (McGraw-Hill)
[Build a Book Online,

http://web.archive.org/web/19980513002459/http://mhhe.com/primis/ and http://www.mhhe.com/primis/catalog/pcatalog/primisweb.ppt] in view of Rowe [USP 6,073,148].

Regarding to claims 2, 5, 10, 13, 18 and 21, McGraw-Hill teaches all the claimed subject matters as discussed in claims 1, 4, 9, 12, 17 and 20, but does not explicitly discloses the step of receiving a user-provided location for inserting the identifier of the user-provided content into the content object, and inserting the identifier into the list at that location. Rowe teaches a method for creating an optimized PDF file, by creating a list of objects and

Art Unit: 2162

shared objects to organize the objects and place the objects in the optimized file in the same order (Rowe, Col. 10, Line58-Col. 11, Line 13). It would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the McGraw-Hill method by including the technique of organizing the object in the list in order to build a customized e-book.

Regarding to claims 3, 8, 11, 16, 19 and 24, McGraw-Hill and Rowe teaches all the claimed subject matters as discussed in claims 2, 5, 10, 13, 18 and 21, Rowe further discloses the step of providing a user interface communicating with the data repository, and providing mechanisms for receiving the user-provided content and specification of a desired location through the user interface (Rowe, Col. 10, Line58-Col. 11, Line 13).

#### **Conclusion**

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUNG Q PHAM whose telephone number is 571-272-4040. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOHN E BREENE can be reached on 571-272-4107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2162

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
